

Protect the Trail Experience We All Love
with the 7 Principles of

Leave No Trace

1. Plan Ahead and Prepare

Plan where you are going and pack everything you need to be healthy and safe. Bring a trail map too!

2. Travel on Durable Surfaces

Protect sensitive plants and help stop erosion by only traveling on existing trails.

3. Dispose of Waste Properly

Pack out everything you bring into nature, including dog poop!

4. Leave What You Find

Take nothing but photos. Removing items from nature means plants and wildlife are no longer able to use them.

5. Minimize Campfire Impacts

Only build campfires where you are sure they are allowed.

6. Respect Wildlife

Do not feed wildlife and always observe at a distance. You're a guest in their home!

7. Be Considerate to Other Visitors

Other people like peaceful visits to nature too. Keep music off, speak softly, and yield the trail to faster visitors.
